

When Installing a Solar Photovoltaic or Wind Generator System, EcoAge Technologies will walk you through each step:

1. Assess your site for solar or wind resources
2. Select your desired system size and configuration
3. Select your specified system options
4. Calculate total material, installation, permit, engineering, and consultation costs
5. Calculate your system's payback period and your return on investment
6. Create and sign contract, including any maintenance/monitoring contract options
7. Down payment on your selected system
8. EcoAge Technologies will obtain the required permits
9. EcoAge Technologies will install and have your system inspected
10. We'll test your system and train you how to use it
11. Final payment
12. **Get paid for your power!**
